

Civil Engineering

EMTEK

Our civil engineering team works in partnership with consulting and structural engineers, local authorities and designers in the delivery of infrastructure projects. We work on highways, bridges, culverts and maintenance schemes, providing project management, plant operatives and skilled sub-contract services.

Key Features

- Specialist infrastructure services
- New build, refurbishment & maintenance
- Project management & site installation
- QMS to ISO 9001:2000
- Constructionline, CITB & CSR accredited
