EMTEK

Premises Protection

Strong and robust

Emtek have been providing quality products and services since 1994.

Our Ultraprotek brand brings together a unique range of strong and robust products to protect premises and enhance the urban built environment.

You will see our products installed throughout Northern Ireland and Republic of Ireland, comprising of:

Safety Barriers
Premises Protection

Speed Ramps
Site Safety

Pedestrian Guard Rails
Pedestrian Safety

Bollards
Street Furniture

Safety Barriers

Our safety barrier products are designed to offer cost effective protection to buildings and hazards within industrial, car park and commercial applications. Posts can be surface mounted or excavated and beams can be supplied in either single or double height configuration. Corners, wing terminals and yellow end caps are also available.

Speed Ramps

Our speed ramps help to reduce vehicle speed within car parks, yards and entrance/exit points.

Available in 50mm or 70mm high modular units, the black and yellow sections are manufactured from recycled plastic, ensuring they are robust and durable.

An alternative speed cushion system is available for larger sites such as shopping mall and airport road ways where a higher speed within the site road network is common. These speed cushions are manufactured from recycled rubber and use highway specification features to help reduce vehicle speeds. They are also better suited to sites that require emergency vehicle or bus access.

Pedestrian Guard Rails

Our Pedestrian Guard Rail's are ideal for quick installation and repairs. Available in 2.0m panels with either a solid or vision gap infill, they are BS: 7818 compliant. Manufactured from steel and then hot dip galvanised to BS EN ISO 1461 they are a strong and long lasting product.

Bollards

Our range of bollards provides cost effective access control, protection to property and also act as delineators for pedestrians and motorists in towns and sites. Choose from our selection of materials, finishes and types (excavated, surface mounted, removable and telescopic).
