

Traffic Calming

EMTEK Traficop System

Our preformed Speed Cushions are the ideal solution for effective traffic calming in urban and residential environments. They are acceptable to the emergency services, bus operators and cyclists, while quietly and effectively reducing vehicle speeds.

Emtek Traficop is suitable for many applications, particularly bus lanes, emergency service access and cycle routes, as well as residential areas. Preformed construction ensures accurate and uniform dimensional profile together with a fine lead edge on ramps.

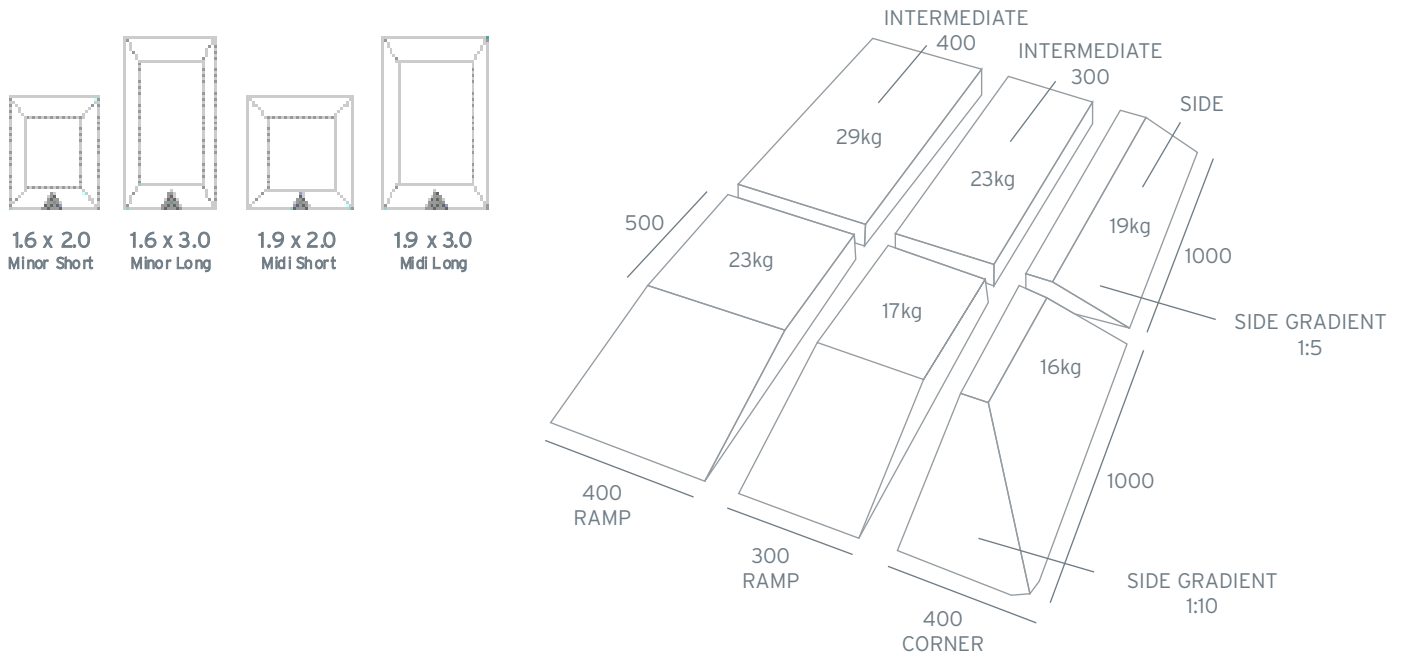

Our cushions are easy to install, require no excavation or road closure and can be relocated if necessary. Available in a range of standard sizes and in both black and red colour types they are readily available for fast-track installation requirements.
