

# UCB/TCB/OBB/DROBB Safety Barrier

## EMTEK Maintain-Beam

Older generation safety barrier on the road network includes untensioned corrugated beam for low speed applications, tensioned corrugated beam and open box beam systems for higher speed and higher containment applications. All steel sections are high grade Steel with finished product Hot Dip Galvanised to BS EN ISO 1461 providing long term maintenance free protection against corrosion.

Emtek are committed to the long term stocking, maintenance and servicing of D.O.T. designed systems. For new work schemes or long sections of the network that have been damaged, compare our EN: 1317 approved systems for the most economical solution.

### KEY FEATURES

- Widely used systems designed by DOT
- Replacement components available ex-stock
- Experienced installation teams
- Maintenance free galvanised steel finish
- Range of Posts centres
- Post can be driven, socketed, surface mounted or excavated
- Radius beams available

### PERFORMANCE

Product Reference	Performance Class	Working Width	Post Centres
TCB	N2	W6	3.2m
OBB	N2	W4	1.2m
OBB	N2	W5	2.4m
DROBB	H1	W4	2.4m
