

Pedestrian Guard Rail (PGR)

EMTEK Solid Infill

Designed to prevent pedestrians from straying out onto dangerous areas, particularly when vehicular traffic is nearby, our PGR Solid Infill system is BS: 7818 (Class 2) compliant, with all manufacturing and installation third party verified under our quality management schemes.

Modular design allows for ease of handling on-site and fast-track installation. All steel sections are Hot Dip Galvanised to BS EN ISO 1461 after manufacture, providing long term maintenance free protection to corrosion.

Key Features

- Designed in accordance with BS: 7818 (Class 2)
- Maintenance free galvanised steel finish
- Standard Panel widths at 2000mm, 1500mm and 1000mm
- 1150mm high
- Also available raked, radius or cranked
- Ideal for pedestrian crossing points outside car parks and factories

Emtek can offer bespoke PGR designs to meet client requirements, including top railings, decorative infill systems and high specification UK HA Type IV Paint systems.

Please contact our sales team to discuss your requirements.
