

# Shelters

## EMTEK Shelter Systems

Where there is an obligation to provide staff and public with shelters, Emtek can offer a variety of innovative and creative designs. Our Shelters are contemporary, secure, strong and robust which accommodate for all weather conditions.

The versatility of our shelters means they can be adapted to meet your unique requirements. Our dedicated teams are on hand to use their experience and expertise in order to devise the most effective design and offer technical advice.

Emtek shelters not only offer practical solutions for protecting bicycles but also provide shelter for smokers, motorcycles and sports dug outs.

In the past, Emtek have worked alongside Universities and clubs to offering a very unique and bespoke service. Our dedicated teams of specialist staff have been able to devise a design which suits the needs of the client such as a Team Dug Out incorporating roller blinds to maximise security within and also protect the public in bad weather conditions. In addition seating can be installed into the shelters for maximum comfort and modern day design.
