EMTEK

SAFETY BARRIERS

3 Ways to Improve Your Perimeter Protection...

Helping you protect

People | Buildings | Equipment

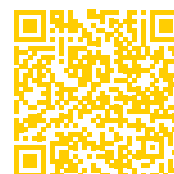

Strong, robust protection.

We understand how important it is to select the correct type of safety barrier for your project. From car parks, industrial factories, busy yards and commercial applications, we've got you covered with a tried and tested solution.

With years of experience in this specialist sector, we have the ability to provide a safety barrier that gives

you the optimal level of protection, whilst catering for your unique site and project requirements

Safety Barriers

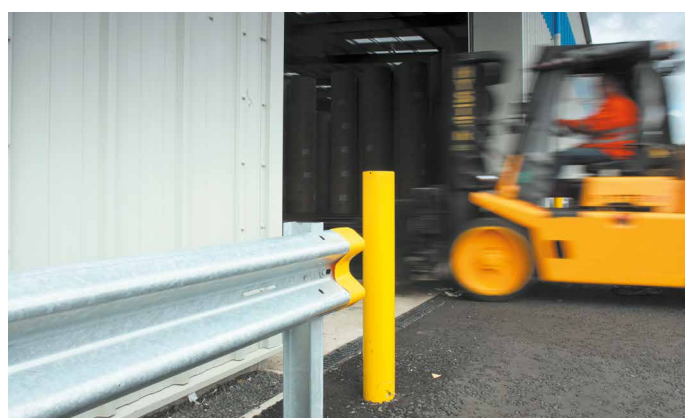

Perimeter Protection

Emtek's range of safety barriers include single and double height systems, with a selection of post configurations to accommodate surface mounted base plate or excavated systems to cope with your sites ground/surface conditions.

All materials are hot dip galvanised to BS EN ISO 1461 providing a long lasting and durable solution.

We provide an extensive range of safety barriers throughout Ireland.

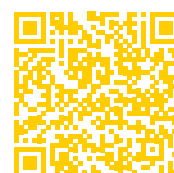

Anti-Ram Protection.

Our beautiful Antrim Stainless Steel Bollards have a hidden anti-ram protection core to ensure your premises are kept safe and looking good.

With many modern retail spaces designed with contemporary, glazed facades and ease of customer parking close to the store frontages, it's important to provide protection

that can withstand impacts and provide a pleasant aesthetic detail. We've got you covered with our extensive range of bollards.

Bollards

Perimeter Protection

Emtek's range of bollards can help protect retail stores, forecourts, cash machines, buildings, EV chargers and fuel pumps, not to mention helping delineate walkways and protect doorways. Choose from stainless steel recycled plastic, galvanised, powder coated and Ferrocass materials to suit your unique requirements.

Antrim Bollard

Wickow Bollards

Our bollards help provide protection whilst allowing the safe movement, flow and access of pedestrians around your facility.

Safely guiding pedestrians.

Keeping people safe at busy crossing points and footways can be tricky, but we have a BS 7818 compliant solution that's perfect for every application.

Our Pedestrian Guard Rails are designed to prevent pedestrians from straying onto dangerous areas, particularly when vehicular traffic is nearby.

They can also be used on cycle and greenway routes.

Pedestrian Guard Rails

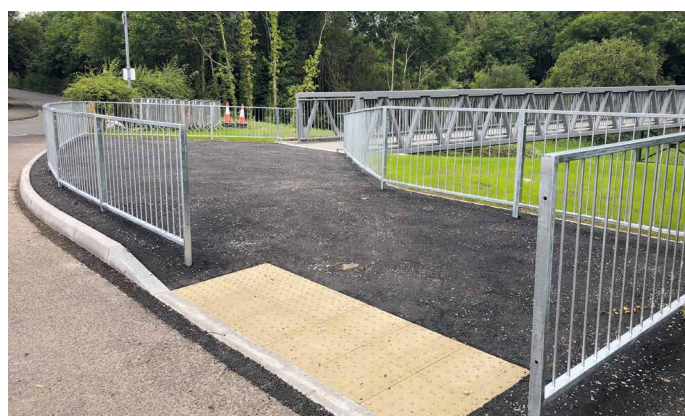

Perimeter Protection

Emtek's range of prefabricated guard rail panels are supplied in easy to use 2.0m sections, with either a solid infill or vision gap panel detail.

Precision manufactured from high grade steel and performing to the BS 7818 (class 2) specifications, all our railings are then hot dip galvanised to BS EN ISO 1461. This ensures you receive a strong and durable guard rail. Our PGR panels are quick and easy to bolt together, with 1.5m, 1.0m and 0.5m sizes also available.

All Emtek Pedestrian Guard Rail panels are hot dip galvanised to BS EN ISO 1461.

Helping Provide Strong & Robust Perimeter Protection

Our extensive range of products allow you to define walkways, organise operations and prevent pedestrians from accidentally straying into vehicle routes and unsafe areas.
