

CONSTRUCTION MATERIALS

3 Steps to Create Beautiful Paving...

Helping You Build A
Stronger Infrastructure

Building on a solid foundation.

We understand how important it is to select the correct products for each paving project. Our bedding and priming materials are designed to exceed the requirements of BS 7533, ensuring your work stands the test of time and provides exceptional strength.

BS 7533 has been developed over 20 years to offer clear, consistent and tested methods for designing

and constructing rigid and flexible paving areas offering a minimum construction life of 40 years.

High Strength Bedding & Priming

EcoBed / ProPrime

Selecting the correct bedding concrete and primer is key. Our materials offer exceptional strength for the crucial base layer, coupled with an exceptional bond between the base layer and the underside of the paving slabs / setts.

Eco-Bed and Pro-Prime form the foundation for every project; helping you create beautiful paving.

Eco-Bed can be laid from 10mm-75mm in one pass.

Eco-Bed

Pro-Prime

Prem-Prime

Test	Requirements of BS 7533	Eco-Bed
Compressive Strength	35N/mm ²	45N/mm ²
Adhesive Strength	>2.0N/mm ²	2.5N/mm ²
Flexural Strength	>4.5N/mm ²	6.3N/mm ²

Pro-Prime provides the paving with an incredible bond (adhesion strength) of 2.20N/mm².

Selecting a grout that will stand the test of time is crucial.

Flowpoint has been exceeding the demands of clients across Ireland for over 20 years. It can be used in a variety of project environments, from public realm schemes, landscaping and private domestic projects. Flowpoint is synonymous with robust, premium, and fast track jointing in Ireland.

Flowpoint grout is easy to mix, apply and wash down. It's high strength gain allows your paving to be open to pedestrian traffic in just 1 hour and vehicular traffic in 4 hours.

Rapid Setting Flowable Grout

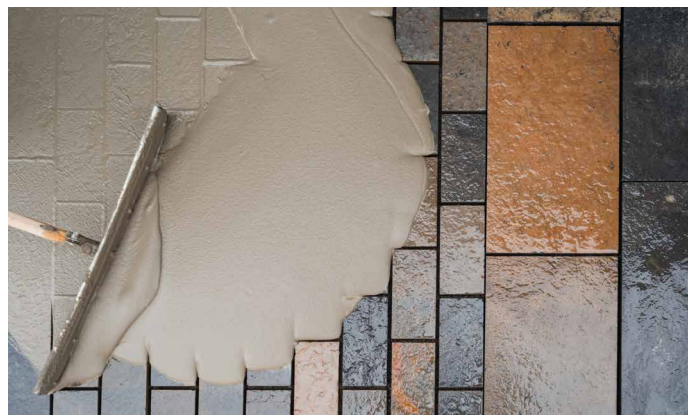

Emtek Flowpoint

UltraScape Flowpoint is our market leading rapid set grout, exceeding the requirements of BS 7533. It is shrinkage compensated and provides exceptional bond strength, locking in the whole paving system. Flowpoint achieves an outstanding 49.6N/mm² compressive strength, ensuring it can take high traffic demands and stand the test of time.

Flowpoint is available in four finishes: regular, smooth, fine and eco.

Flowpoint can be supplied in natural grey, charcoal and stone grey

Flowpoint is easy to mix and apply. It's rapid setting to get the job completed quickly.

Getting stone to stick and bond in tricky applications is not easy.

However, we've got you covered with our exceptional high bond mortars and adhesives; Resi-Bed & SlipBond.

Resi-Bed is perfect for bonding paving inside metal recessed covers, often required within public realm and domestic paving schemes. It provides exceptional strength, is waterproof and chemical resistant.

SlipBond is designed to bond stone cladding to vertical walls, with its special high strength formulation and extended workability times, it's perfect for allowing large intricate areas to be covered.

High Bond Adhesives

Resi-Bed / SlipBond

UltraScape Resi-Bed is a resinous mortar ideal for bedding granite setts and paving elements in recessed covers due to the exceptional compressive strength of 75N/mm^2 and adhesive strength of 45N/mm^2 .

Emtek's UltraScape SlipBond is a flexible cladding adhesive for internal and external use, specially formulated with extended workability for fixing brick slips and natural stone to a range of substrates. It can be applied to a thickness of 3mm-20mm and is frost resistant, making it ideal for use in all weathers.

Resi-Bed has a high adhesive strength of 45N/mm^2 .

<< Slipbond

Resi-Bed

SlipBond can be applied to a thickness of 3mm-20mm and it's frost resistant.

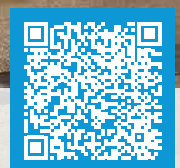

A resin mortar has exceptionally high bond strength and is a long lasting solution for areas subject to extreme wear and tear.

Helping you create beautiful paving

Emtek StreetScape

Eco-Bed and Pro-Prime help you form the crucial base layers. In handy pre-packed bags, they are quick to mix and easy to apply, providing exceptional strength.

For over 20 years, we've been helping contractors bed, prime and grout their top-class paving schemes, all over Ireland. With our exceptional range of premium streetscape materials and technical support team, we're with you every step of the way.

Emtek StreetScape

Our extensive range of Flowpoint grout, along with our specialist adhesives SlipBond and Resi-Bed, allow you to complete your paving schemes to the highest standards with a beautiful premium finish.
