

HELPING CREATE A SAFER WORKPLACE

With an ever increasing requirement to safely protect people, equipment and buildings, Emttek have over 25 years’ experience in helping create safer workplaces across Ireland.

Manufactured with A-Safe’s unique iFlex polymer material, our range of workplace safety products allow the railings to absorb and deflect energy from an impact, then reform to the original state. They are engineered for pedestrian walkways, machinery protection, warehousing and manufacturing applications, across all industry sectors.

WITH YOU EVERY STEP

We work alongside our clients in delivering world class safety improvements. Our experienced teams provide a full service approach, ensuring we are with you every step.

1. Site survey – our field based project managers visit and survey your facility.
2. Engineered solution – our technical team calculate & design the optimum safety solution.
3. Technical approval – our CAD/Commercial team provide drawings and costings for client approval.
4. Site installation – our project installation teams fulfil the workplace safety improvements and complete the work on-site.

PEDESTRIAN & TRAFFIC SEGREGATION

Our Railings and Barriers offer physical protection between people and workplace vehicles, such as fork lift trucks. We help segregate and guide staff in areas of high risk within the workplace to ensure the safe movement of staff and goods.

BUILDING & MACHINE PROTECTION

We provide robust protection to machines, equipment and physical building infrastructure, with our barriers being engineered to withstand repeated high impact strikes, preventing damage to assets and reducing repair and maintenance costs long term.

RACKING PROTECTION

Our racking solutions help protect the physical storage structure but also help mitigate against the overall cost of damage to stock resulting from a potential impact to the racks. Specially designed and engineered to absorb and deflect fork lift strikes, our products are quick and easy to install.
